REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach in combination as claimed a source measurement unit (SMU), which includes comparing the measured current with the current range and determining whether or not the current range is optimum. If the current range is found not to be optimum, changing the current range and performing another measurement of the current output from the voltage source with the newly changed current range. The limit is set at a value not to exceed the user-specified value and at an upper limit value in the newly changed current range. If the current range is found optimum, the current measurement device outputs the resulting current measurement value, and then raises the current range by making a corresponding change in the limit. By setting the up-ranged current range as the limit in this manner, it reduces the possibility that the voltage applied to the device under test from the SMU varies because of the current limit.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
